Elements of Life: H₂O

What Is Water?

A water molecule, H₂O, consists of two hydrogen atoms and one oxygen atom. The hydrogen atom contains one positive proton at its core, with one negative electron revolving around it. Oxygen, contains eight protons with eight electrons revolving around it. **The single hydrogen electron and the eight electrons of oxygen are the key to water being the chemistry of life.**

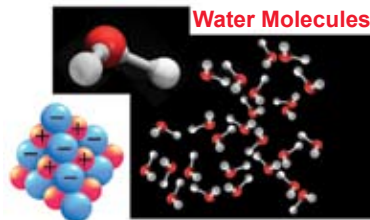

Aliens & Water

Water is the most dominant element on our planet. It is so crucial, that its presence on another planet is considered the single most critical and exciting clue that scientists can find in their search for life. Yet, we take our water for granted and overlook its essential role in our health.

Are You Chronically Dehydrated?

This simple compound of three atoms (H₂O) makes up almost 70% of our body weight. A 2% decrease results in fatigue. A 10% drop can lead to chronic health complaints causing significant problems and greater losses can be fatal. Subtle dehydration is thought to afflict 30% - 50% of Americans **75% of Americans are suspected of being chronically dehydrated.**

The human body consists of roughly 20 trillion living cells and approximately 10 - 13 gallons of water. Each cell swims in a fluid of salty water. All proteins, minerals, vitamins, fats and other molecules are suspended in that water. **Water is present in every cell and is essential to its survival.** Water is a vital component of all body fluids, tissues, cells, lymph, blood and glandular secretions. **Good hydration cushions the bones and joints, regulates body temperature, flushes toxins, transports nutrients and empowers the body's natural processes of healing.**

Water Cluster

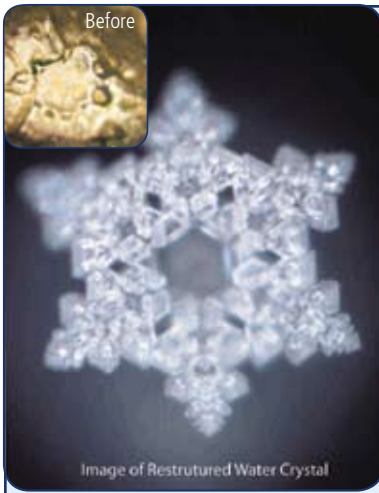

Proper hydration provides for healthy cell repair and regeneration. An improperly hydrated cell becomes weakened and more susceptible to infection and alteration (malignancy). **You cannot achieve optimum health without accommodating your body's many needs for water.**

“Water is the stuff of life - it is the most dominant element on our planet.”

A number of conditions have been classified by physicians, nutritionists & researchers as being brought about by persistent dehydration. These conditions include:

- Allergies
- Alzheimer's
- Anger
- Anginal Pain
- Anxiety
- Arthritic Pain
- Asthma
- Attention Deficit Disorder
- Autoimmune Disease
- Bulimia
- Cancer
- Colitis
- Constipation
- Cravings
- Depression
- Dyspeptic Pain
- Fatigue
- Fibromyalgia
- Headaches & Migraines
- Heartburn
- Heart Failure
- Hiatal Hernia
- High Blood Pressure
- High Cholesterol
- Impatience
- Insomnia
- Irritability
- Joint & Back Pain
- Lymphoma
- Morning Sickness
- Obesity
- Osteoporosis
- Parkinson's
- Shortness of Breath
- Diabetes
- Weight Gain

You're Not Sick - You're Thirsty!

The body is approximately 70% water, the brain is 85% water. Our body functions as a water vapor or steam pressurized engine. Water is the single most important substance required for life. Within our body, **water is responsible for all the interactions that control cell behavior and ultimately dictates the state of our well-being.** Some of our body's many biological needs for water include:

- DNA & Cellular Formation
- Metabolic Efficiency
- Brain & Nerve Function
- Detoxification
- Diffusion & Homeostasis
- Absorption of Nutrients
- Cellular Communication
- Blood Plasma Formation
- Intracellular Structure
- Molecular Movement

It is vital to consume healthy "living" water to ensure that our body's many needs for water are met. BioVitale-H₂O® crystalline structured water provides pure, life-sustaining properties required by the trillions of cells in our bodies.

Water Has Memory

Naturalist and scientist, Johanne Grander, reveals that water is **like a liquid tape recorder**, capable of storing information and vibrational frequencies. No matter what filtration or purification process it goes through, **disease markers and frequencies remain in the memory of all water.**

For hundreds of centuries (vapor to rain), disease markers from waste products of billions of people and animals have been recorded in the water. All water on earth, even distilled water, is recycled and very low in oxygen levels. **Everybody is flushing the toilet and drinking somebody else's disease!**

Pure Water Hoax

There is no pure water! Only at birth, within our cells, is water found in its pure state. However, due to exposure to stress, pollutants and radiation, it loses its original geometric properties and begins to destabilize.

Original geometries of water have changed within our cells and within our environment. **Unless we permanently alter the structure of water, the memories of viruses, pathogenic bacteria, parasites and spores will continue to proliferate and pollute our water a long period of time,** but, one day, you look in the mirror and wonder how you got so unhealthy! That is perhaps where you are at now and why you are still reading this letter. I know. I understand. I was once where you are now.

Thoughts & Sounds Effect Water

Ordinary water forms large clusters consisting of 168 molecules. A small fraction of water available today may consist of clusters as small as 4, 8 or 12 molecules, however, these types of clustered water are not able to permeate the cellular wall as easy and may not adequately hydrate our tissues. They simply irrigate our bodies with numerous disease markers and the frequencies they contain. These liquid crystal, molecular **water structures store in their memory every experience this water has had, affecting every living tissue with which it comes into contact.** Dr.

Even thoughts or sounds have an effect on water, changing the structure of the molecules.

Emoto of Japan photographed water crystals under a microscope clearly demonstrating that water molecules respond to various energies, absorbing and storing energy frequencies. **Even thoughts or sounds have an effect on water,** changing the structure of the molecules. **BioVitale-H₂O® is unlike any water you have ever tasted.** It is a hydrating, life-giving, restructured water of superior quality that hydrates your tissues. By adding it to other water, it helps restore the water to its original pure state. **Experience the transforming difference from drinking "living" water! Experience the energetic, hydrating and life-giving qualities that water was intended to have!**

Critical Healing Factors

Today's water is imprinted with the frequency and memory of diseases, it is low in oxygen and low in electrons: two critical factors which give water it's healthy properties. Water molecules are measured by the angle of the hydrogen bond - all water typically measures at 104 degrees with variance to 109 degrees. When water is distilled, during the steam process, the angle increases to 120 degrees - a very high energy capacity! Unfortunately, once the steam condenses it collapses to only 101 degrees. BioVitale-H₂O® water is reported to maintain a constant 114 degree angle, attributing to it's **unique high energy capacity and anti-pathogenic properties.**

"...engineered to break the extremely tight hydrogen bonds and release the frequency and disease markers."

Patent Pending Process

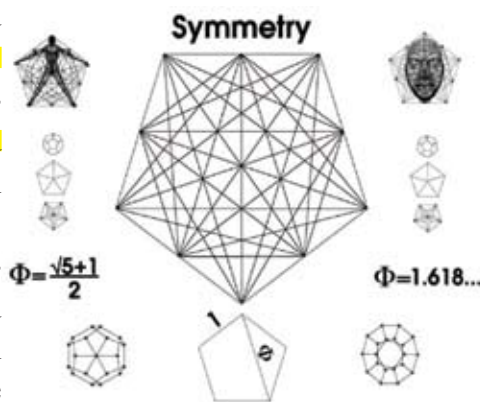

Our patent-pending proprietary process is believed to be the only method in the world that is thought to destroy disease markers while increasing the electron potential and oxygen levels in the water. Distributors of bottled, purified, distilled, reverse osmosis, ozonated, spring, filtered, or alkaline water can not make this claim. Our process increases the angle between the hydrogen atoms providing a 10 degree differential, increasing the viscosity of water and producing water that has a crystalline structure at room temperature with a unique dodecahedral (12 plane) geometric pattern.

Key Factor

Altering the molecular property of water so it will accept free electrons is the key factor. By rapid expansion and contraction of water molecules it is engineered to break the extremely tight hydrogen bonds and release the frequency and disease markers.

Leading Technology

BioVitale-H₂O® water is leading technology. Unlike other water systems, **electron enhanced BioVitale-H₂O® water continues to purify itself.** Due to the unique dodecahedral crystalline structure of the water, **it also has the ability to store and transmit energy.** Some believe the dodecahedron represents an idealized form of Divine thought, will or idea. BioVitale-H₂O® water has no competition; its amazing 12-faced crystalline structured water clusters have stronger bonds and contain more molecules than any other water. We can see how **these unique properties of BioVitale-H₂O® water are unparalleled and essential to purifying our body and the environment.***

NOTE: There may not be scientific research to thoroughly satisfy all skeptics regarding the above statements. Nonetheless, they are the result of our experience and beliefs based on those experiences. The many testimonials of satisfied BioVitale-H₂O® users shows that this water is a revolutionary development. We continue to research in order to develop credible answers. BioVitale-H₂O® is not represented to prevent, cure or treat any particular disease. The purpose of drinking BioVitale-H₂O® should be to feel great, live healthy and hydrate your body.

Protect Yourself!

Ecological Factor

60 - 70% of rural populations in the developing world do not have access to a safe and convenient source of clean water, nor a satisfactory method of waste disposal. Bring the power of transformation into your life by using BioVitale-H₂O® structured water.

How To Use:

BioVitale-H₂O® is a concentrate. Each dropper makes 1 gallon (1 bottle = 60 gallons). For the first 7 days, take 1 dropper under the tongue 3x/daily. Thereafter, place at least 1 dropper of BioVitale-H₂O® in 1 gallon of purified water and drink 1 oz. of the gallon daily for each 2 pounds of body weight. (For example: a 100 lb. person would drink 50 ozs. daily), but no more than 4 ozs. at one time. Continue indefinitely or as directed by your health practitioner.
