

Rejuv-Erect®

Aging male bodies become more susceptible to circulation issues, including erectile dysfunction.

Studies indicate that a diet rich in fruits and vegetables may help us to stay healthy due to high concentrations of antioxidants and other beneficial compounds. We shall call these compounds SuperFoods. Antioxidants are an important type of SuperFood.

Rejuv-Erect® is designed to support your sexual experience.

Rejuv-Erect® is a drug-free blend of premium quality natural herbal ingredients that enhance and support sexual experience. Our sexual activity decreases as a result of aging. Rejuv-Erect® proprietary formulation is designed to provide a response to this natural decrease in libido. To regain your youthful vigor and to revive your sexual experience, order Rejuv-Erect® today. Rejuv-Erect® is a drug-free and natural alternative to drug male enhancement products. Rejuv-Erect® helps you achieve a more consistent and powerful sexual experience.

Is Rejuv-Erect® safe?

Rejuv-Erect® is a drug-free natural supplement that helps raise the dimension and duration of erections. Rejuv-Erect® is a natural and risk-free option to dangerous prescription drugs. Ever read the list of adverse effects for these prescription drugs?

As with any ingested product, it is recommended that you consult with your physician or licensed health care professional prior to taking Rejuv-Erect®, especially if you have a medical condition or are allergic to shellfish. If you have any medical conditions or allergies that require medical attention, you should always consult your physician before taking any dietary supplement.

What To Expect From Rejuv-Erect®

Sexual activity is a significant component of a healthy relationship and a satisfying and healthy life. A man's sexual virility gradually decreases as a result of age. Rejuv-Erect® helps to counteract this decline by enhancing the overall quality of a man's sexual experience.

Healthy sexual activity is a contributor to a satisfying and healthy life. An erection is an important part of that sexual activity. The penis consists of three chambers. When aroused, blood flow increases to the chambers, producing an erection. The more blood in the chambers, the larger the erection. This is why a healthy heart and good circulation is important for sexual activity.

Natural, premium quality Rejuv-Erect® is a male dietary supplement that men are increasingly talking about as they discover how well it works for them.

Rejuv-Erect® Supports:

- Increased Libido
- Generation of sex hormones
- Enhanced desire, performance and stamina
- Balanced energy
- Improved enhanced intimacy

Rejuv-Erect® ingredients

Rejuv-Erect® contains a drug-free blend of natural, herbal ingredients that enhance and support sexual experience: Epimedium Extract, Green Tea Extract, L-Arginine Extract, Maca Root Powder, Silkworm Extract, White Willow Bark Extract, Oyster Powder and Yohimbe Bark Extract.

Silkworm Extract

Also known as bombyx mori extract, silkworm is a chemical compound extracted from the silkworm. Silkworm extract has been used for many years to provide stronger and more sustainable erections and to stimulate men's libido and sexual drive. Additional benefits of silkworm extract are support for back pain, arthritis, fibromyalgia, carpal tunnel syndrome and headaches.

Silkworm extract has been shown to decrease blood clotting. Some scientists are concerned that it could worsen a bleeding disorder. Therefore, if you suffer from a bleeding disorder, it is best to see a doctor before deciding to use silkworm extract. Some people use silkworm extract for heart problems and "hardening of the arteries" (atherosclerosis).

White Willow Bark Extract

The use of willow bark has existed for thousands of years. Willow bark has been utilized in China and Europe for pain, headache, and inflammatory problems including bursitis and tendinitis. The white willow bark contains salicin, a chemical akin to aspirin (acetylsalicylic acid). The herb is pain-relieving and an anti-inflammatory. Originally, salicin was utilized to produce aspirin, but eventually synthetic production was more profitable, more Big Pharma logic. White willow may be slower than aspirin to create pain alleviation, however its effects can last longer.

Willow bark can be used to help relieve pain and decrease swelling. Research indicates that willow can be as effective for decreasing pain and inflammation as aspirin and at a significantly lower dosage.

Willow bark can raise energy levels and provides endurance. This is one reason why the effects of Rejuv-Erect® may remain for days.

Oyster Powder

Clinical trials have shown that bioactive compounds in oyster powder increase the anti-oxidant capacity of blood and increase the production of Glutathione.

Glutathione is a major anti oxidant. It protects cells from oxidative damage. Oxidative damage, especially in the mitochondria of the cells, causes the cells to produce less energy which causes reduced efficiency in chemical reactions in the body. Reduced efficiency symptoms include fatigue, compromised immunity, premature ageing and poor sexual health.

Oysters are the highest natural source of zinc. It is 10 times higher than red meat.

The elements and micronutrients in oyster powder provide the building blocks for over 300 enzymes in the body. These are involved in reactions that control everything, from the way we look and feel to strong immunity and sexual health.

Epimedium Extract

Epimedium is a pungent herb found in Asia and the Mediterranean. The Chinese call it Yin Yang Huo. Legend has it that the name "horny goat weed" came from a herder who noticed his goats becoming more sexually active after eating the plant.

Although epimedium extract has a history of traditional use for disorders of the kidneys, joints and liver, its principle use in the United States is as an aphrodisiac and to combat fatigue.

Yohimbe Extract

Native to the Congo, Cameroon, Nigeria and Gabon, yohimbe provides a wide variety of benefits. The bark of the yohimbe was used originally by West Africans to treat leprosy, fever and coughs. It has also been used to prevent heart disease, as a hallucinogen and an aphrodisiac. Yohimbe is said to prevent various depressive disorders as it inhibits monoamine oxidase (MAO) and dilates blood vessels. Yohimbe is frequently used to treat erectile dysfunction. No research has been completed that supports yohimbe's medicinal uses.

L-Arginine

L-arginine is an amino acid found in plant and animal proteins, such as dairy products, meat, poultry, fish and nuts.

Necessary for the production of protein, L-arginine helps rid the body of ammonia (a waste product) and stimulates the release of [insulin](#). In addition, L-arginine is used to make nitric oxide a compound that relaxes the blood vessels and is necessary for perfect erections.

L-arginine may benefit men with erectile dysfunction. In 1999 a study published in the journal BJU International, 50 men with erectile dysfunction took either 5 grams of L-arginine per day or a placebo. After six weeks, more men in the L-arginine group showed improvement compared to those taking the placebo. Long-term continued use is the key to performance.

L-arginine is thought to enhance the action of nitric oxide and to relax the muscles surrounding blood vessels supplying the penis. The result is that blood vessels in the penis dilate, increasing blood flow, which may help maintain an erection. The difference is that certain drugs block an enzyme called PDE5, which destroys nitric oxide, versus L-arginine making nitric oxide, a natural process. Unlike certain drugs, L-arginine may be taken on a daily basis.

Green Tea Extract

The active constituents in green tea are polyphenols, with a powerful antioxidant called epigallocatechin-3-gallate (EGCG). The antioxidant activity of EGCG is about 25-100 times more potent than vitamins C and E. One cup of green tea may provide 10-40 mg of polyphenols and has antioxidant effects that are greater than a serving of broccoli, spinach, carrots or strawberries. Much research shows that green tea supports the anti-aging.

Maca Root Powder

Maca is a root plant that is similar in appearance to the turnip. The plant grows in the Andes Mountains and some other regions in South America.

Studies have shown that Maca root powder can support balanced hormones. The plant is often used to combat erectile dysfunction.

A benefit of using Maca is that the plant can improve libido in men and can also improve the quality of sperm production. While the plant hasn't been studied extensively, it is often used to treat sexual dysfunction related to the use of anti-depressants in both men and women. The powder also has been shown to reduce bad cholesterol and improve good cholesterol.

How To Use

Rejuv-Erect® is a natural dietary supplement that enhances your sexual experience. A Rejuv-Erect® blister-pak contains daily doses of two capsules. The capsules should be taken on an empty stomach. You should expect a dosing period of one to four days. During this period, increased blood levels are achieved and increased libido and performance become more evident. After this period, maintenance levels will vary according to individual physiology. Rejuv-Erect® should be taken daily as part of a normal dietary regimen.

Take Rejuv-Erect® daily, but also take 2 capsules with an 8 oz. glass of water several hours before sexual activity. Frequent intake of water is recommended for a healthy and active lifestyle.
